Nitesh Narang

Product Engineer

nitesh@nivyaan.com | +91 91068 57146 | Ahmedabad, India | LinkedIn

I've shipped products used by 10k+ users. Now I want to know why they stayed, and what made them pay.

EXPERIENCE

Nivyaan Labs, Technical Founder — 10/2025 – Present

- Ran deep user research to explore building our own product, and learned the hard way that shipping beats over-researching.
- Led an engagement to automate drafting for advocates, from discovery to delivery, before deciding to postpone the product due to unclear ROI.
- Deep enough in the tech to see bottlenecks early, close enough to users to find the right solution, building products that matter in the market.

Asika AI (fmr. Novocuris), Frontend Architect (Contract) — 03/2025 – 09/2025

- Owned the healthcare panel, from scoping to delivery, serving 2,500+ patients.
- Drove white-labeling strategy, enabling faster enterprise client onboarding across multiple geographies.
- Cut UI development time by 50% through modular architecture, accelerating feature development across the platform.

Crework Labs, Full Stack Engineer (Contract) — 10/2024 – 02/2025

- Owned the build of SaaS email outreach modules used by 500+ users on launch day.
- Engineered secure Gmail consent and authentication flows, reducing onboarding friction for new users.
- Designed and shipped Campaign REST APIs the frontend consumed from day one.

Alyve Health, Frontend Engineer — 11/2021 – 04/2024

- Owned the frontend for App 2.0 (10k+ users) and the Admin Dashboard serving 100+ enterprise clients.
- Independently architected and shipped Diagnostic & Reimbursement modules with zero post-launch regressions.
- Automated endorsement and order workflows, improving operational speed by 25% and freeing team bandwidth.
- Integrated health SDKs, improving analytics accuracy by 20% and directly informing product decisions.

Neog.camp, Teaching Assistant — 02/2021 – 08/2021

- Managed a 17-person cohort, owning the delivery pipeline and improving throughput by 10%.

OpenEducat (fmr. Tech Receptives), Application Engineering Intern — 11/2020 – 03/2021

- Owned the build of the wishlist and cart modules, the core of the platform's shopping flow.
- Rebuilt dynamic product pages in React, replacing a Python-based web framework, improving UX and lifting page views by 30%.

SKILLS

Technical

React, Next.js, Node.js, NestJS, TypeScript, MongoDB, MySQL, REST APIs, Firebase, AWS Console

Product & Business

Product Scoping, User Research, Systems Thinking, GTM Strategy, Analytics & Metrics, Sales Enablement

EDUCATION

B.Tech in Computer Science & Engineering
Parul University
2015 – 2019 | Vadodara, India

Higher Secondary (CBSE)
Airport School
2013 – 2015 | Ahmedabad, India
